### Tactics: Habits That Block Change Part IV, Part V, and Part VI

Correcting errors in thinking is first. The other half is the behavior that results from these thoughts. TACTICS are habitual ways of acting that keep people stuck in destructive lives. Tactics are ways to take control and build walls to shut out those who would help us. They block the most crucial step in

change: looking at ourselves. When clients become aware of tactics and how they use them, change becomes possible. For staff, the leader's guide provides a fuller understanding of these tactics and opens the way for greater effectiveness.
